Lift works in historic tunnels completed ahead of schedule

Works on the lifts in the historic Grade II-listed Tyne Pedestrian and Cyclist Tunnels have been completed ahead of schedule in a single weekend.

The works were originally planned over two weekends - 22-25 February and 1-4 March.

The completion of the works at the weekend means both lifts are now back in service and there will be no disruption for cyclists and pedestrians next weekend.

The tunnels are due to close for a year for refurbishment after Easter.
